GRANDMA USED SAGE TEA TO DARKEN HAIR

She made up a mixture of Sage Tea and Sulphur to bring back color and gloss, thickness.

Common garden sage brewed into a heavy tea with sulphur and alcohol added, will turn gray, streaked and faded hair beautifully dark and luxuriant, remove every bit of dandruff, stop scalp itching and falling hair. Just a few applications will prove a revelation if your hair is fading, gray or dry, scraggly and thin. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way to get the ready-to-use tonic, costing about 30 cents a large bottle at drug stores, known as "Wyeth's Sage and Sulphur Compound," thus avoiding a lot of fuss.

Wade wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and, after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.

BIGGEST AD ORDER EVER SENT BY WIRE

(Special to The Republican)

JEROME, Ariz., Oct. 7.—The book of the United Verde Copper Company was sent by wire to the office of the U. V. Consolidated at 10 o'clock on the morning of Wednesday, October 7, for the sale of two hundred thousand shares of treasury stock at 75 cents. An official permit was issued by the corporation commission this week.

In order to avoid brokers taking advantage of the public clamor for U. V. Consolidated to boost the price to three or four dollars a share before the stock is even issued, the company has arranged for display advertisements in the leading dailies of Arizona, and all the large cities of the country. These advertisements will appear Sunday morning and warn the public that the opening price of U. V. Consolidated is 75 cents a share. The principals of the company are determined to control the price of the stock to this extent, but realize that they can exercise no control after issuance. It seems certain that quotations will advance to several dollars within a week.

Copy for the advertisements and payment for the space were transmitted Friday night by telegraph. It is the largest single order for advertising ever placed by wire in the west, and the largest ever placed by a mining company.

Present indications are that the treasury stock will be oversubscribed five or six times. Brokers have applied for more than half a million shares of the stock which will be sold direct to the public, however. At the first meeting of the stockholders, held in Jerome as soon as the company was granted a charter by the corporation commission, Robert W. Winfield, president of the Camp Verde State Park, and one of the wealthiest merchants of northern Arizona, was elected president. Dr. Paul McIntosh was made vice president. Don Robinson, postmaster of Clarkdale, treasurer; E. C. Farrell, secretary.

Within a week the company will let a contract for twenty thousand feet of diamond drilling on its two groups of claims. Representatives of two big diamond drilling concerns have been on the ground several days. The contract will call for two drills operating simultaneously.

Engineer J. D. Sperr, formerly with the Tom Reed and United Verde, has reported favorably on the consolidated holdings. His report is even more enthusiastic than that of Engineer George A. Bethune, who has been employed to supervise development. Like Bethune, Sperr recommended the diamond drill method of locating the ore bodies.

MINERS DRILLING CONTEST WILL BE STAGED FOR FAIR

Great interest is being manifested in the single and double back drilling contests to be held at the Arizona State fair, under the direction of Superintendent J. V. Prochnaska, of the mineral department.

The old time miner who labored with hammer and drill is passing before the advance of the mechanical drill, and as thousands of people have never seen this method of drilling employed, the fair commission has offered generous cash prizes for these drilling contests to the victors to the fair might see the work of the old timers.

To make it more interesting, a modern, latest pattern machine drill will be shown in actual operation. Another contest is the contest to be held between the mine rescue crews. Nearly all the large mining companies now have crews drilled for first aid and mine rescue work, and the fair commission has offered large prizes for contests between these crews.

The men comprising the first aid and mine rescue crews are picked for their intelligence, knowledge of mine conditions and physical fitness, and it would be hard to find a finer body of men in the state.

The first aid crews are drilled in Red Cross methods of emergency treatment of wounds, the art of properly dressing and bandaging wounds, etc., as used in the United States army.

The mine rescue crews are drilled in the use of such paraphernalia as the pulmotor and oxygen helmet. The latter is connected with a small steel tank carried on the miners' back, and enables him to remain in the densest smoke or gaseous atmosphere, without discomfort for a period of two hours. Many a miner throughout the country owes his life to the expertness of these crews.

The mine rescue and first aid contests will be held at the fair on Tuesday, November 14, starting at 10 a. m.

COTTRELL VISITOR AT MINING BUREAU

F. G. Cottrell, chief metallurgist of the United States Bureau of Mines has been a visitor at the office of the Tucson mine station on the campus of the University of Arizona for the past week. The object of Dr. Cottrell's visit was consultation with Director Karl L. Kithill regarding the problems that are to be taken up by the U. S. station at their local headquarters.

Work is now going on preparing laboratories and offices and investigating the field for problems.

There will probably be six men employed by the organization at the present time.

A VISIT TO FUNSTON
[Republican A. P. Leased Wire]
SAN ANTONIO, Oct. 6.—Brigadier General E. H. Crowder, judge advocate general of the army, arrived here today for a conference with General Funston. He will see the latter upon his return from Laredo tomorrow. General Crowder intends visiting points along the border before returning to Washington.

ARIZONA RAY OPENS OFFICE IN PHOENIX

Representatives of the Arizona Ray Copper Company arrived in Phoenix Wednesday and have thoroughly equipped offices at the corner of Central and Adams streets over the Santa Fe ticket office. Although their offices have only been opened a few days a large amount of stock has been subscribed for already. The Arizona Ray Copper company is so well located that one of the engineers of the U. S. Smelting & Refining company wrote their representatives for a substantial amount using these words, "It is good enough for me to buy and lay away on location alone."

The Arizona Ray Copper company's twelve claims, paid for in full, adjoin the Ray Consolidated as well as the Hercules and churn grilling is going on at this time. Two drills are in operation and a third one has been ordered and paid for and is in transportation at this time.

The men at the head of the Arizona Ray company are all of high standing in their respective locations and the ability of the W. L. Wilson company is known throughout the United States as brokers.

ENGINEER YOUNG TO SEE NORTH DOMINION

Otis E. Young of this city, a man well known for his mining knowledge, left Phoenix Thursday morning for Globe, and was on the property of the North Dominion Copper Mining & Development corporation of that city all day Friday, with the idea of satisfying himself as to the merits of the claims made by the company regarding the shafts, the ore in sight, etc.

M. R. Sutherland, local manager said yesterday, "We know a great many cases where such a course would not have been practical as very few properties have been developed before their stock was offered to the public and in such event the only thing to do would be to send a mining engineer, which would entail a big expense, and even then his report would likely be in 'technical' terms, and most companies have these expert reports on file, and it is understood that Mr. Young is not an engineer, but a practical mining man."

"This state is rapidly taking the lead in mining. It is even in its infancy, and the mining production of the next few years will add enormous wealth to the state and give employment to thousands."

A PATRIOTIC CALL

Battleship of Arizona Silver Service

Your contribution to help defray the expense of this service will be gladly received at any bank in the county.

We Arizonians must "come through" and "do our bit" in representing our great state in the presentation of this silver service to this great protector of America's interests, at home and abroad.

The "boys" on the boat will greatly appreciate this donation, and should the time come that they, with their lives, must protect our national honor, and preserve those traditions which we hold most dear—they will give full loyalty and their Americanism to protect our America, our homes and our posterity.

STATE COMMITTEE

Allen T. Bird,
Nogales,
Secretary

Capt. L. W. Mix,
Nogales,
Chairman

Maricopa County Committee
Dwight B. Heard,
Chairman

V. E. Hanny,
Dr. J. C. Norton,

YOU CAN HELP

Knowing the public spirit of the people of Maricopa County in all matters pertaining to the good of our state, we are sure that an immediate and hearty response to this appeal will be made. Arrange your affairs to contribute during the next four days.

**Send Your Contribution to
Any Bank in the County**

I hereby enclose the sum of \$..... which is to be used in the purchase of the Battleship Arizona Silver Service.

Signed
